EDUCATION

University of Applied Sciences Bonn-Rhein-Sieg
Master of Science in Autonomous Systems

Bonn, Germany
Apr 2019 - Dec 2021

- **Cumulative GPA:** 1.7 / 4.0 (1.0 highest grade)
- **Relevant Coursework:** Artificial Intelligence, Machine Learning, Neural Networks, Deep Learning, Natural Language Processing, Mathematics for Robotics and Control, Robot Perception
- **Thesis:** [Self-supervised Learning for Sonar Images: Enhancing Multimodal Perception for Underwater Applications](#)

Autonomous University of Baja California
Honors Bachelor of Science in Physics

Baja California, Mexico
Feb 2013 - Dec 2017

- **Cumulative GPA:** 94.45 / 100.0 (100.0 highest grade)
- **Thesis:** Microstructures for a Scalable Multi-layer Ion Trap for Quantum Information Processing

University of Göttingen
Student Exchange (Bachelor of Science in Physics)

Göttingen, Germany
Aug 2016 - Aug 2017

- **Cumulative GPA:** 1.7 / 4.0 (1.0 highest grade)
- **Relevant Coursework:** Biophysics, Statistical Mechanics, Robotics, Machine Learning, Computer Vision
- **Scholarships:** ALAS Foundation, UABC Foundation, DAAD (13,000\$ awarded for top 4% of program)

PROFESSIONAL EXPERIENCE

Epirus, Inc.
Machine Learning Engineer

Torrance, California
May 2022 - Present

- **Project:** Modeling of radio-frequency power amplifiers short and long (nanosecond to seconds) memory effects used in telecommunications and high-power microwave systems with applications to digital pre-distortion, radio-frequency system design & simulations, phased antenna arrays
- **Contribution:** Designed, implemented and trained neural networks on real-life waveform data (CNNs, RNNs, Volterra series, Short-time Fourier Transforms, ComplexRNNs). Built optimized and scalable data pre-processing and training pipelines (cloud multi-GPU training, up to 100 TB of parallel data preprocessing) in the cloud (Docker, AWS S3-Lambda-ECR-SageMaker, Weights & Biases)
- **Impact:** Developed technology was key to enable our team receive 4.4 million dollars in funding through the office of naval research (ONR) to continue research optimizing power output of digital-domain phased arrays
- **Project:** Development of machine learning infrastructure for model evaluation used in the detection and tracking of unmanned aerial vehicles (UAVs) with broad applications in autonomous perception and planning
- **Contribution:** Designed and implemented cloud infrastructure (AWS S3-SageMaker-EC2, Flask) and interfaces to allow our teams for a fast and accurate evaluation of object detector and segmentation models such as YOLO and PointNet with specific quantitative and qualitative metrics (heat maps, uncertainty estimation, mean average precision, precision, recall) and real-time rendering
- **Impact:** Contributions impact directly the development and integration of a sensor-fusion perception system with a high-power microwave phased antenna array
- Mentoring interns, actively interviewing candidates, attending conferences

Infovision, Inc.
Computer Vision Engineer (4 months)

Dallas, Texas
Feb 2022 - May 2022

- **Contribution:** Implemented pose estimation algorithms (OpenPose, PifPaf) in Nvidia Jetson Xavier devices for real-time multi-person pose estimation
- **Contribution:** Implemented image segmentation models (Mask R-CNN, PointRend) on real-life phone screen datasets to estimate amount of surface damage
- **Tools:** Pytorch, TensorRT, Detectron2, OpenCV

German Research Center for Artificial Intelligence (DFKI)
Machine Learning Researcher (1 year, 4 months)

Bremen, Germany
Oct 2020 - Feb 2022

- **Project:** Improve the perception capacities of underwater systems using deep learning and multimodal approaches
- **Contribution:** Implemented self-supervised learning algorithms in tensorflow for underwater sonar image classification, and image translation algorithms for image enhancement
- **Contribution:** Creation of a new underwater image dataset, implemented ROS nodes for data logging (camera-sonar), post-processing hundreds of gigabytes of data
- **Impact:** Project will benefit from created dataset, pre-trained models, [published poster](#) (ICCV) and [paper](#) (CVPR)
- **Tools:** Python, Tensorflow, OpenCV, ROS, Scikit-learn, Keras

Fraunhofer Institute for Algorithms and Scientific Computing (SCAI)
Machine Learning Researcher (1 year, 7 months)

Bonn, Germany
Aug 2019 - Mar 2021

- **Project:** Detect anomalies due to ice accumulation in wind turbines, perform high-quality reconstruction of 3D CFD turbulence data
- **Contribution:** Implemented Variational Autoencoders on 2D and 3D turbulent data for high-quality reconstruction.

Performed unsupervised anomaly detection of time series using generative models (Variational Autoencoders). Achieved 96 % classification accuracy on custom wind turbine simulation time series data

- **Impact:** Provided first insights into wind turbine data interpretability, results were presented to partner company
- **Tools:** Python, Pytorch, Torchvision, Scikit-learn, Time Series Analysis

INTERSHIPS

UnitedHealth Group (UHG)

Technical Consultant (6 months)

Cypress, California

Oct 2018 - Mar 2019

- **Contributions:** Developed tools using relational databases (SQL and Microsoft Access) to automate the workflow for the creation of contracts. This reduced the time taken to generate contracts significantly

Monterrey Institute of Technology

Machine Learning Intern (5 months)

Monterrey, Mexico

May 2018 - Sep 2018

- **Contributions:** Implemented pipelines to train machine learning models for classification of audio segments from human conversations. Tools used: Keras, Scikit-learn, MFCC Spectrograms. Presented poster at the [International Meeting of Artificial Intelligence and its Applications](#) (RIIAA)

Softtek

Junior Software Engineer (4 months)

Ensenada, Mexico

Jan 2018 - Apr 2018

- **Contributions:** Designed a WebApp using .NET technologies with an emphasis on entity framework. Tools used: C # , SQL, CSS

National Metrology Institute of Germany (PTB)

Physics Researcher (7 months)

Brunswick, Germany

Mar 2017 - Sep 2017

- **Project:** Build and characterize state-of-the art micro semiconductors (ion traps) for quantum computing
- **Contributions:** Worked in ultra clear room systems doing gold layer deposition, sputtering, performed ion trap characterization via high resolution microscopy and electrical breakdowns
- **Impact:** Results helped my group understand better the limits and operating conditions of multi-layered ion traps, conference poster presentation, paper published in journal

Joint Quantum Institute (JQI)

Physics Research Intern (4 months)

Maryland, USA

June 2015 - Sep 2015

- Built an optical switch using tapered optical nanofibers to be able to manipulate the transmission intensity of a 1064 nm laser. Presented poster results at the Quantum Information Division (DICU) annual meeting

SKILLS

- **Programming Languages & Frameworks:** Python, C# , Matlab, ROS, Flask, CUDA, Pytest (unit testing)
- **Machine Learning Tools:** Pytorch, Tensorflow, Scikit-learn, Numpy, Nvidia Jetson-TensorRT, OpenCV, SciPy, Keras
- **Software Engineering Tools:** Git, Github, Linux, LaTeX, Docker, AWS (S3-EC2-ECR-RDS-Lambda- SageMaker)
- **Spoken Languages:** Spanish (native), English (Toefl IBT 106), German (B2.2)
